PROFESSIONAL SUMMARY

Data Analyst with strong expertise in SQL, Python, Excel, Power BI, and Tableau. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, and predictive modeling. Experienced in transforming raw data into actionable business insights using machine learning techniques.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Data Analysis: Data Cleaning, EDA, Statistical Analysis, Feature Engineering, Predictive Modeling

Machine Learning: Regression, Classification, Random Forest, XGBoost, NLP

Visualization Tools: Power BI, Tableau, Matplotlib, Seaborn

Databases: MySQL, MongoDB

Tools: Excel, Jupyter Notebook, VS Code, Google Colab

Libraries: pandas, numpy, scikit-learn

EXPERIENCE

Data Analyst Intern

April 2025 – June 2025

NULL CLASS, Bengaluru, India

- Analyzed large datasets to extract meaningful insights and improve business decision-making.
- Performed data cleaning and preprocessing using Python and SQL.
- Developed interactive dashboards using Power BI to visualize KPIs.
- Applied statistical techniques and machine learning models to solve real-world problems.
- Collaborated with cross-functional teams to deliver data-driven solutions.

PROJECTS

HR Analytics Dashboard

July 2025

GitHub: <https://github.com/priyanshusharma0045/HR-Analytic-dasboard>

- Built an end-to-end HR analytics dashboard using Power BI to track employee attrition, performance, and KPIs.
- Performed data preprocessing on 75,000+ records including missing value treatment and outlier detection.
- Conducted exploratory data analysis to identify workforce trends and patterns.
- Improved decision-making by visualizing key metrics such as attrition rate and employee satisfaction.

Vendor Sales Analysis

- Built an end-to-end data analysis pipeline to evaluate vendor performance, sales trends, and profitability using real-world transactional data.
- Performed data preprocessing using Python and SQL, including data cleaning, transformation, and integration.
- Stored processed data in a structured database for efficient querying and analysis.
- Conducted exploratory data analysis to identify top-performing vendors and profitability patterns.
- Developed interactive visualizations to analyze sales vs purchase behavior and uncover business optimization opportunities.

Airbnb Price Prediction Model

- Developed a machine learning model to predict Airbnb listing prices using regression techniques.
- Implemented feature engineering and applied NLP on text-based features.
- Trained supervised learning models achieving 63% prediction accuracy.
- Used scikit-learn and pandas for model building and evaluation.

EDUCATION

Bachelor of Computer Applications (BCA)
SRM Institute of Science and Technology, Tamil Nadu
CGPA: 8.88

Present

CERTIFICATIONS

- Hackathon – Generative AI, IIT Madras (2025)
- Hackathon – AI/ML, IIT Madras (2025)
